Standard elements of quality assurance

- Regulations and guidelines produced by the QA agency
- A self-evaluation prepared by the institution
- Appointment of a peer group to review the institution or programme, starting by reviewing the self-evaluation

Standard elements of quality assurance

- Site visits by the peer group
- Publication of the report or, in some cases, only the decision

CHEA Quality Platform

Judith
Eaton

Stamenka
Uvalić-Trumbić

What is the Quality Platform?

- An outcomes-based external review of alternative providers of higher education for their performance and quality
- Can be used nationally or internationally

QUALITY PLATFORM STANDARDS

- Are learning outcomes articulated and achieved?
- Do they meet post-secondary level standards?
- Can credits be transferred?
- Is transparent information available?

The Seven International Quality Principles

Quality and higher education providers: Assuring and achieving quality in higher education is the primary responsibility of higher education providers and their staff.

Quality and students: The education provided to students must always be of high quality whatever the learning outcomes pursued.

Quality and society: The quality of higher education provision is judged by how well it meets the needs of society, engenders public confidence and sustains public trust.

The Seven International Quality Principles

Quality and government: Governments have a role in encouraging and supporting quality higher education.

Quality and accountability: It is the responsibility of higher education providers and quality assurance and accreditation bodies to sustain a strong commitment to accountability and provide regular evidence of quality.

The Seven International Quality Principles

Quality and the role of quality assurance and accreditation bodies: Quality assurance and accreditation bodies, working with higher education providers and their leadership, staff and students, are responsible for the implementation of processes, tools, benchmarks and measures of learning outcomes that help to create a shared understanding of quality.

Quality and change: Quality higher education needs to be flexible, creative and innovative; developing and evolving to meet students' needs, to justify the needs of society and to maintain diversity.
