International E-Conference on
Health System and COVID-19: The Lessons Learned

Using Online Education Effectively in Higher Education after the Pandemic

Sir John Daniel – Acsenda School of Management, Canada

Context

Before:

- COVID-19 has disrupted the lives of students and professors
- Medical schools have been pioneers in using Educational Technology

Now:

- Are you making greater use of Ed Tech during the pandemic?

After:

- Will you use online education differently in future?

Using
Online Education
effectively in
Higher Education
after
the Pandemic

What lessons from teaching classes LIVE on Zoom etc.?

LESSON 1

- You need ASYNCHRONOUS online courses as well as SYNCHRONOUS online courses *(more flexible for professors, more useful for students)*
- *Make use of OPEN EDUCATIONAL RESOURCES*
- *Keep video lessons short (10-15 minutes)*

What lessons from teaching classes LIVE on Zoom etc.?

LESSON 2

- Use every possible mechanism to increase the intensity and quality of your INTERACTIONS with students.
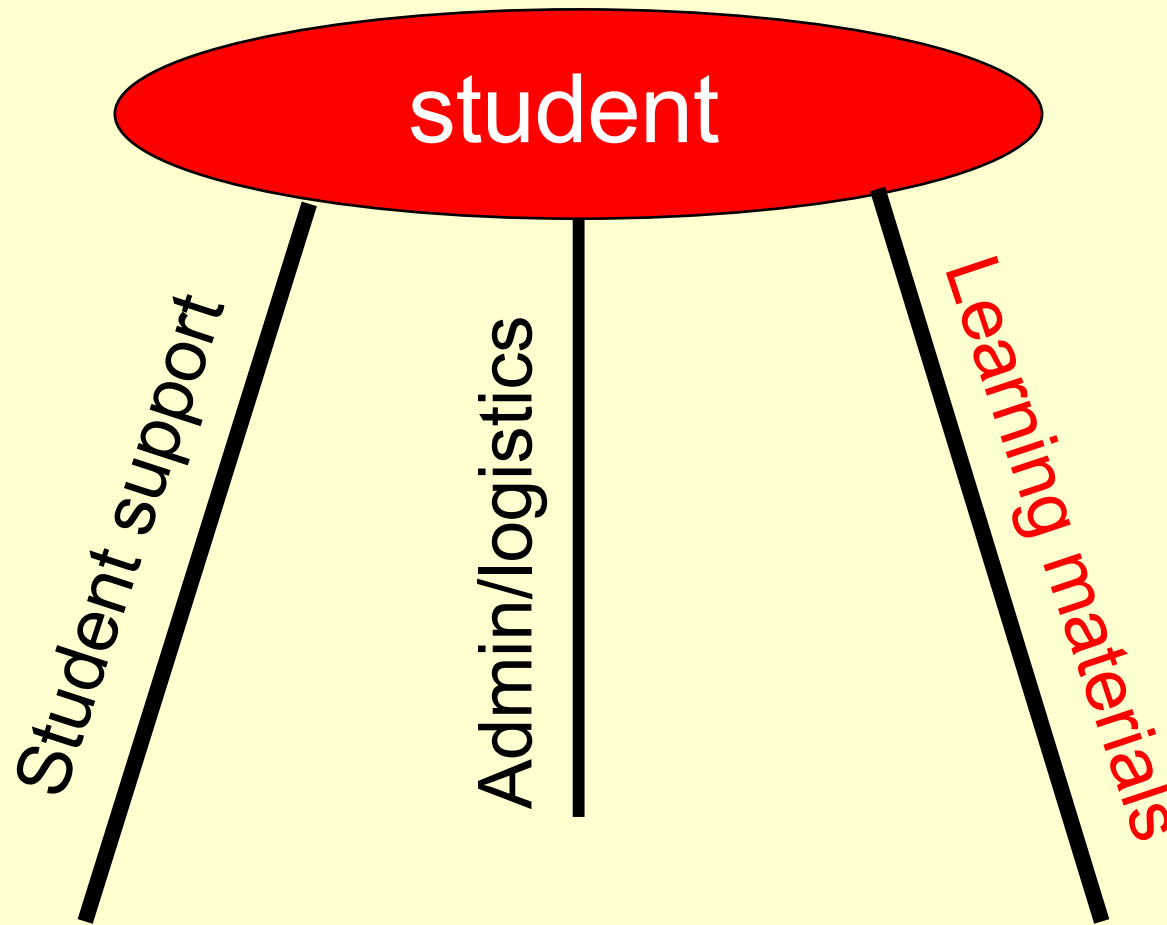

(Students may be disoriented by independent study and will miss interaction with other students – project student services into their homes.)
